

Apollo Silver

- Outstanding Performance
- Lifetime Warranty
- User Friendly Reliability

Get Big Water Conditioning Performance In A Compact Size

The Apollo Silver Series water conditioning system is a self-contained unit that softens, filters, reduces ferrous iron, clarifies and polishes your water with an exclusive, all in one space-saving cabinet.

Exclusive electro-mechanical timer automatically controls the entire operating program. It's versatile with, four easy-to-set adjustments delivering an abundance of treated water while minimizing salt and water usage. You set your system for your specific water quality and use.

Apollo Silver Series Features:

Exclusive Composite Valve

Uses advanced NORYL™ composite material to enhance strength and to protect the valve from expansion or shrinkage due to pressure and temperature demands.

Electro-Mechanical Timer

Simple yet versatile controls allow you to set the system for the exact quality, pressure and usage you desire. Many other water treatment systems do not have controls this versatile.

Powerful High Torque Motor Self-lubricating and with power to spare, for maintenance-free, long life operation.

Large Porting & Internal Piping Apollo Silver gives you generous water flow rates.

Automatic Bypass During Regeneration No chance of being without water, or drawing salty water, during the regeneration process.

Conditioning Resin The resin possesses an unusually high conditioning capacity and resistance to bead breakage, especially important in chlorinated water supplies. Filters out and removes high amounts of ferrous iron.¹

Activated Carbon Specially graded and treated activated carbon clarifies and polishes your water.

¹ does not remove ferric colloidal or bacterial iron

The smart, economical way to solve severe water problems in your home.

Handy Guest Tab A simple push of the tab starts a complete regeneration cycle giving you extra treated water if and when you need it.

Large Salt Refill Opening Quick. Easy. And no spills.

Tank-Within-A-Tank Construction Rugged tank is wound with over 3 miles of glass filament for extraordinary strength. Inside there's another tank of sanitary plastic so your drinking water will never touch interior fiberglass surface.

Compact Patented Design Self-contained unit fits in tight places. It's so revolutionary, it's patented.

Metered Refill Lowers Salt Cost The system measures and prepares the amount of brine required for regeneration based on desired settings.

How the Apollo Silver Series System works:

Step 1: Raw, untreated water enters RainSoft's exclusive rugged control valve and flows down through the resin tank.

Step 2: The water is filtered and treated as it passes through the special "ion exchange" resin. Specific unwanted foreign substances are ionically retained both in and on the resin. The optional carbon bed further

polishes and clarifies the water.

Step 3: Once completely conditioned, the water exits the resin tank through the riser pipe and out the control valve.

Step 4: At predetermined intervals, the unit begins a regeneration process. Using salt as a regenerant, the retained foreign substances are flushed out of the system and down the drain. The unit then prepares itself for the next conditioning cycle.

Note: Potassium chloride may be used instead of salt.

Other Benefits:

- All plastic enclosures fit tightly to protect control components from outside elements.
- An ultraviolet inhibitor prevents degradation of materials caused by sunlight in outside installations.
- The brine tank is equipped with overflow protection to protect against overflow due to power outages during regeneration.

RainSoft
Water Treatment Systems

Apollo Silver models LMC are UL and CSA listed, are certified by WQA to ANSI/NSF standard 44, and are certified by TÜV to meet European CE requirements. Refer to the manufacturer's Performance Data Sheet for specific claims and certifications.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion Partners L.P. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion Partners L.P. does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assume no liability therefore.
