Reverse Osmosis Drinking Water Treatment Systems

RainSoft's Most Versatile Drinking Water System.
Customized To Deliver The Best Drinking and Cooking Water Possible.

RainSoft RO = The Ultimate Drinking Water Solution.

Now you have an even greater choice -with options- when it comes to selecting the finest drinking water system available for your family.

RainSoft reverse osmosis drinking water systems combine high efficiency along with your choice of pre-filter, post-filter, and system capacity. Your RainSoft dealer can help you to choose the system that's best for your local water conditions.

Systems are available in 3 models: UF10, UF22, and UF50.

UF10: high production CTA R.O. element, spun-wound sediment pre-filter, taste and odor post-filter.

UF22: high production TFC R.O. element high efficiency carbon block sediment pre-filter, superior carbon block sediment post-filter.

UF50: high production TFC R.O. element, high efficiency carbon block sediment pre-filter, superior carbon block sediment post-filter.

A smart, economical way to solve severe water problems at your house.

How System Works

1. Water from your inlet valve enters the system.
2. Water is forced through the pre-filter cartridge that removes particles, and polishes the water prior to entering the reverse osmosis membrane.
3. Water then enters the reverse osmosis cartridge where it is filtered through a spiral wound, semi-permeable membrane.
4. The resulting highly filtered, reverse osmosis water enters a storage tank with a butyl bladder. The tank hold the reverse osmosis water on one side of the bladder and air on the other.
5. Your reverse osmosis water is finally filtered through the system post-filter and dispensed through a dedicated drinking water faucet.

System Delivers Superior Filtration

The Ultrafiner system uses the reverse osmosis to filter extremely small particles-particles that can easily slip through a less sophisticated filter.

System Features:

- modular design makes changing all filters simple
- no need to drain the storage tank when changing filters, thanks to the convenient shut-off valve
- the dual positioning storage tank can be mounted on its side, if necessary
- the system incorporates a reversible, self-cleaning drain restrictor and easy fast-flush device
- choice of pre-filters and post-filters take care of almost any water concern
- produces very low sodium "ingredient quality" water for drinking and cooking
- installed with a RainSoft Filtergard Air Gap Faucet, contamination due to possible back siphoning is eliminated.

Ultrafiner models UF22TCB, UF22N-CB are certified by WQA to ANSI/NSF standard 58. Ultrafiner models UF50T-CBVO, UF50N-CBVO are certified by WQA to ANSI/NSF standards 58 & 53. Refer to the manufacturer's Performance Data Sheet for specific claims and certifications. For conditions of use, health claims certified by the California Department of Health Services, and replacement parts, see product data sheet. California Department of Health Services Certification Numbers: 02-1522 (Model UF50N-CBVO), 00-1438 (Model UF22TCB).

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion Partners L.P. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion Partners L.P. does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assume no liability therefore.
